

MORE STRENGTH. MORE STABILITY.

The sports flooring industry's first truly bio-mechanically designed and tested suspended maple flooring system, Bio-Cushion Classic has become one of the most popular resilient systems available. The Bio-Cushion system is bio-mechanically engineered for enhanced comfort and performance levels for athletes of all levels. Playing characteristics can be "tuned" depending on usage requirements to maximize resiliency and reduce the negative effects of the floor on the athlete.

- As a result of combining a thicker maple surface, dual layer subfloor, and resilient bio-pads, this floor can be perfectly fine tuned for aerobics, ballet, and martial arts, in addition to gymnasium flooring
- Excellent non-athletic load bearing capabilities with a continuous subfloor that adds strength and load stability throughout the floor

Product Specifications

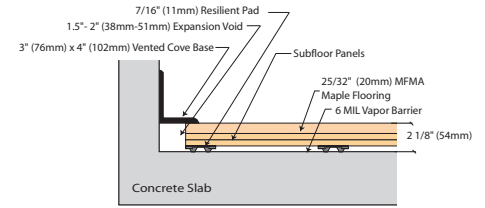

System Type	Floating Panel
Slab Depression	<p>2 1/8" (54mm) with 25/32" (20mm) maple and 7/16" (11mm) pad</p> <p>2 3/8" (60mm) with 33/32" (26mm) maple and 7/16" (11mm) pad</p> <p>2 1/2" (64mm) with 25/32" (20mm) maple and 3/4" (19mm) pad</p> <p>2 3/4" (70mm) with 33/32" (26mm) maple and 3/4" (19mm) pad</p> <p><i>Other options available</i></p>
Surface- MFMA Northern Hard Maple	Robbins Continuous Strip® XL (FJ)
Subfloor Construction	2 layers of nominal 1/2" x 48" x 96" (12mm x 1219mm x 2438mm) exposure 1, rated subfloor sheathing
Resilience Layer	Many pad options available
Vapor Barrier	6 MIL Polyethylene
Optional Construction	Contact a Robbins Representative for Alternative Systems
LEED Contributions	<p>MR credit 4, 5, & 7</p> <p>IEQ 4.1, 4.2, 4.3, 4.4</p> <p>FSC® Lumber Available</p> <p><i>*Credits are based on products selected and location of facility</i></p>
Warranty	1 year Industry Standard with optional Extended Warranty Program (<i>Egis Floorlife</i>)
